

Driver Wallet Test Cases

Test Case ID	Test Scenario	Expected Result
TC_WALLET_001	Verify wallet is displayed for Active driver	Wallet details are displayed successfully
TC_WALLET_002	Verify wallet is displayed for Pending driver	Wallet details are displayed successfully according to permissions
TC_WALLET_003	Verify wallet is displayed for Blocked driver	Wallet details are displayed but restricted actions are applied
TC_WALLET_004	Verify total balance is displayed correctly	Total balance value is correct
TC_WALLET_005	Verify current balance is displayed correctly	Current balance is calculated correctly
TC_WALLET_006	Verify processing balance is displayed correctly	Processing balance appears correctly
TC_WALLET_007	Verify total balance = current balance + processing balance	Total balance equals current + processing
TC_WALLET_008	Verify Active driver can submit withdrawal request	Withdrawal request is created successfully
TC_WALLET_009	Verify Pending driver cannot submit withdrawal request	Request is rejected with proper validation message
TC_WALLET_010	Verify Blocked driver cannot submit withdrawal request	Request is rejected and no deduction occurs
TC_WALLET_011	Verify withdrawal request decreases current balance	Amount deducted from current balance
TC_WALLET_012	Verify withdrawal request increases processing balance	Amount added to processing balance
TC_WALLET_013	Verify total balance remains unchanged after withdrawal request	Total balance remains the same until completion
TC_WALLET_014	Verify completed withdrawal decreases total balance	Total and processing balances updated correctly
TC_WALLET_015	Verify rejected withdrawal returns amount to current balance	Amount restored to current balance
TC_WALLET_016	Verify bank transfer can be created for Active driver	Transfer created successfully
TC_WALLET_017	Verify Pending driver cannot create bank transfer	Transfer request rejected
TC_WALLET_018	Verify Blocked driver cannot create bank transfer	Transfer request rejected
TC_WALLET_019	Verify insufficient current balance prevents withdrawal	Validation message appears
TC_WALLET_020	Verify zero balance prevents withdrawal request	Request cannot be submitted
TC_WALLET_021	Verify negative values are not accepted in withdrawal amount	Validation message appears
TC_WALLET_022	Verify decimal withdrawal amount handling	Amount processed correctly
TC_WALLET_023	Verify processing balance cannot be withdrawn again	Request rejected
TC_WALLET_024	Verify wallet updates after successful bank transfer	Balances updated correctly
TC_WALLET_025	Verify wallet transaction history records withdrawal request	Withdrawal transaction appears
TC_WALLET_026	Verify wallet transaction history records bank transfer	Bank transfer appears

Test Case ID	Test Scenario	Expected Result
TC_WALLET_027	Verify blocked driver cannot perform any financial transaction	All financial actions are restricted
TC_WALLET_028	Verify pending driver permissions for financial actions	System follows defined business rules
TC_WALLET_029	Verify concurrent withdrawal requests handling	System prevents duplicate/conflicting requests
TC_WALLET_030	Verify withdrawal request status transitions correctly	Status changes correctly
